

Universal Adaptor (ITP100 International Travel Plug)

Before you use the universal adaptor, please read the following instruction manual first.

This universal adaptor is a compact one piece unit with 4 international adaptors, and provides a child protection safety shutter, power indicator light and surge protector. This item will fit the plugs in Europe/UK/USA/China/Japan/Australia/Spain and almost every country in the world.

1. For EUROPE, just pull out the plug in the middle. After using it, just push the plug back into the pit.
2. For UK/SPAIN push the button to the "UNLOCK" position. The plug will flip out, pull out the white plastic pin, then push the button to the "LOCK" position. After using it, push the button to the "UNLOCK" position and push back the plug into the hole then push the button back to the "LOCK" position.
3. For USA/JAPAN/CHINA/AUST/THAILAND, push the button to the "UNLOCK" position. The plug will flip out, then swivel the plug to the angle you want and push the button to the "lock" position. After using it, push the button back to the "UNLOCK" position and push back the plug into the hole and push the button back to the "LOCK" position.
4. You can plug this into any available power outlet and then connect your device to the universal adaptor. If the indication light shows red, it indicates that the universal adaptor is working.

WARNING:

1. Make sure your hands are dry before using the universal adaptor.
2. Keep this away from children.
3. This unit does NOT convert voltage. Make sure that the power outlet you intend to use has the proper voltage to run your device before using the adaptor to avoid possible damage to your device.
4. Do not connect more than one plug at a time when using product.
